CAREER SUMMARY

Creative and technically proficient Front-End and Mobile Developer specializing in React and Flutter. Experienced in building scalable, visually engaging applications that solve complex problems. Combines practical expertise in high impact digital branding with a dedication to building software that is not only aesthetically polished but built on maintainable, decoupled architecture.

EXPERIENCE

Mobile Developer Intern, ProgressSoft Corporation

July 2025 - September 2025

- Developed scalable Flutter applications by implementing advanced state management, API integrations, and robust database architectures.
- Ensured high code quality and reduced coupling through clean code practices and rigorous peer reviews.
- Engineered user-centric features that improved UI/UX engagement and streamlined app workflows.

PROJECTS

Jordan Infrastructure Plane - JIP

Led the **UI/UX** design in Figma and developed the responsive **React** front-end for the Jordan Infrastructure Platform (JIP), a centralized interactive map of the nation's underground utilities.

Methaq

Developed modern, multi-role mobile applications with an intuitive **UI/UX**, featuring customized, task-driven user flows for distinct user groups

Athar

Designed and prototyped an intuitive e-commerce website for a sustainable clothing upcycling platform.

Traversal App

Developed and prototyped a responsive mobile travel application using Flutter, ensuring highly accessible interfaces and seamless user journeys.

LANGUAGE

English : professional working proficiency

Arabic : native speaker
